

Write the **Winning Proposal**

Mindy Feature Series | Part 3 of 5

Live → Mindy Launch June 27 · with Eric Coffie

A Federal Proposal Is Hundreds of "Shall" Statements

Every *shall, must, and required* is a hoop.

Miss one — and you lose.

Why ChatGPT Fails Here

Generic AI

It doesn't know your company — or your bid.

- ✓ [Insert your UEI here]
- ✓ [Add past performance]
- ✓ [Company name]
- ✓ Placeholders everywhere

[]

brackets you still have to fill in yourself

Meet Proposal Assist: The Pipeline

1. Wizard (Intake)

Upload the RFP, paste a SAM link — auto-extract scope

2. Bid / No-Bid Gate

Real go/no-go on the incumbent + competition

3. Compliance Matrix

Every shall / must / required, extracted

4. Vault-Grounded Draft

Sections written from YOUR real docs + the solicitation

5. Export to Word

Clean .docx — tables and headings preserved

One Connected Flow

Real routes under `/api/app/proposal/*`

First: Cut to Bid-Ready

SOW/PWS

only opps with a real scope document

The "Has SOW/PWS" Filter

Mindy reads the attached docs and badges each one.

- ✓ PWS / SOW / Combined badges
- ✓ Skip the empty-stub titles
- ✓ Jump straight to evaluable opps
- ✓ Work you can actually bid

What's in Your Vault?

The library every draft pulls from — your real language, not generic AI.

Past Proposals

Your winning language, reused

SOWs / PWS

Scope docs Mindy grounds drafts in

Team Bios

Key personnel, ready to cite

Similar Awards

Past performance proof points

Org Charts

Management plan structure

CLIN Samples

Pricing language to model

Then: Mindy Reads the WHOLE Solicitation

100%

of the solicitation read — not skimmed

The Wizard ingests every page before she writes a word.

Step 1: The Bid / No-Bid Gate

Real Go / No-Go

Surfaces the eliminators that disqualify you fast

Vehicle Required?

Flags if you must hold a contract to even compete

Save the Hours

Don't draft a proposal you can never submit

Signal, Not Noise

Real eliminators only — not a checkbox dump

Intake + Bid/No-Bid at getmindy.ai

- ✓ Open a pipeline pursuit → **Start Proposal**
- ✓ Upload an RFP PDF — or paste a SAM.gov link
- ✓ Mindy auto-extracts scope, NAICS, agency, deadline
- ✓ Bid/No-Bid gate shows the **incumbent + competition**
- ✓ Weigh it → pick **BID** (tracked in the pipeline)

Step 2: The Compliance Matrix

Every Requirement, Extracted

She pulls each obligation automatically.

- ✓ Every *shall*
- ✓ Every *must*
- ✓ Every *required*
- ✓ Nothing slips through

0

requirements missed by hand

What the Matrix Looks Like

Columns: Requirement | Your Answer | Status — each cell links to a Vault doc.

Requirement	Your Answer	Status
Contractor <i>shall</i> hold an active facility clearance (FCL)	No FCL on file	⚠ Gap
Offeror <i>must</i> show 3 yrs relevant past performance	4 yrs — Vault: DHS HelpDesk award	✓ Met
Required: 24/7 support coverage	24/7 NOC + on-call SLA	★ Exceed

Step 3: Grounded Drafts — Real Facts

Your Vault

UEI · CAGE · past performance · contact

Real Facts, Not [Placeholders]

Drafts pull from YOUR profile + the solicitation.

- ✓ Your real UEI and CAGE
- ✓ Your actual past performance
- ✓ Your named contact person
- ✓ Grounded — never guessed

Before vs. After

ChatGPT Draft

- ✓ "[Insert your UEI here]"
- ✓ "[Add CAGE code]"
- ✓ "[Describe relevant past performance]"
- ✓ Generic — guesses your company

Mindy Draft

- ✓ Your real UEI, pulled from the Vault
- ✓ Your real CAGE code
- ✓ "Per our DHS HelpDesk award..." with citation
- ✓ Grounded — never a [placeholder]

Compliance → Draft → Export

- ✓ Compliance matrix builds — Requirement | Answer | Gap
- ✓ Browse the **Vault** → pick a past SOW
- ✓ Mindy drafts a section **grounded in it, with citations**
- ✓ Real UEI / CAGE / past performance fill in
- ✓ **Export to Word** — formatted .docx, tables intact

Step 4: Export to Word

Clean .docx Export

Compliance Matrix + draft sections as one Word doc

Formatting Preserved

Sections, tables, and TOC come through intact

Edit-Ready

Hand it to your team — it's a first-pass, not autopilot

Real Route

`/api/app/proposal/export` → doc-download

And: Know What's Next

Mindy computes the next move per pursuit — from stage + deadline + draft status. No blank columns.

Draft Compliance Matrix

Just started — build the matrix first

Refine Draft

Matrix done — tighten the sections

Submit Proposal

"Finalize — due in 5 days"

Always Moving Forward

Every pursuit knows its next step

Coming: Find Work Under "Funny Names"

Semantic Matching (coming)

Match meaning, not keywords. A "building envelope" contract that's really cyber + construction — surfaced for you.

- ✓ Reads the full scope document
- ✓ Finds work you'd never search for

"Assist, not autopilot — honest about edge cases."
