One Fake Number Loses the Bid

In federal contracting, a hallucinated NAICS code or made-up dollar figure isn't a typo — it's a lost contract.

Why It Actually Costs You

A fabricated NAICS

You chase a market that isn't yours — weeks of capture work spent on a pursuit you can't win. A wasted pursuit.

A made-up dollar figure

You misjudge the prize, mis-price the bid, or cite a number in writing that the CO can disprove in one click — non-compliant.

Generic AI sounds confident. The penalty for being confidently wrong is the contract.

Mindy Never Guesses

Every code, every dollar, every contact traces to a real government source. The AI writes — **the facts come from data.**
