

Find Your **Federal Market**

Mindy Feature Series | Part 1 of 5 — The Hidden 72%

Live → Mindy Launch June 27 | Eric Coffie

The \$50M Mistake

Most people set their alerts on **ONE** NAICS code.
Then they wonder why the work never shows up.

"Drones" Isn't One Code

70+

NAICS codes buy drones — \$245M in FY2025

The obvious code — 336411 Aircraft Manufacturing — is only **28%** of the market.

The Hidden 72%

3 of 4

drone dollars hide in non-obvious codes

Search & Detection (334511) · R&D (541715) · Computer Programming (541511)

It's Not a Drone Fluke

Drones

70+ codes · \$245M

28% obvious · **72% missed**

Cybersecurity

72+ codes · \$2.07B

26% obvious · **74% missed**

Medical Supplies

48+ codes · \$25M

26% obvious · **74% missed**

Every market: the obvious code is only ~1/4. From USASpending FY2025.

Cybersecurity: \$2.07B

74%

of cyber dollars hide outside the obvious code

72+ NAICS codes buy cyber. Only **26%** flows through 541512 (Computer Systems Design). Sellers watching only that one code miss **\$1.5B** in Engineering Services, R&D, and a dozen more.

Medical Supplies: \$25M

74%

of medical-supply dollars hide outside the obvious code

48+ NAICS codes buy medical supplies. The obvious code is just **26%** of the market — the same ~1-in-4 pattern, in a completely different industry. From USASpending FY2025.

What This Costs You

\$50M

one missed code can hide an opportunity this size

Three of every four dollars hide in codes you'd never think to search.

This is the single most expensive mistake in federal BD.

NAICS vs PSC

NAICS = WHO the seller is

The vendor's industry bucket.

Drones top NAICS: "**Aircraft Manufacturing**" — a catch-all that also holds jets and helicopters.

PSC = WHAT was bought

The literal product.

Drones top PSC: "**1550 Unmanned Aircraft**" — exactly what you sell. Pros search by what's bought.

How Mindy Fixes It

Type "drones"

that's the whole input

Keyword-First Research

She derives the full code set for you.

- ✓ Plain words, no codes to memorize
- ✓ 90%-coverage code set, auto-built
- ✓ You never manage 70 codes
- ✓ One missed code can't cost you the deal

The 6-Question Market Scanner

Enter a NAICS + State. Mindy answers all six — grounded in real spend.

1. WHO buys?

The agencies spending in your market.

2. HOW do they buy?

Vehicles & set-asides they use.

3. WHO has it now?

Current incumbents & holders.

4. WHAT opps exist?

Live solicitations to pursue.

5. WHAT events?

Industry days & deadlines.

6. WHO to talk to?

The buyers & OSBP contacts.

● LIVE DEMO — Keyword Research

From one word to the whole market

- ✓ Open getmindy.ai → Market Research
- ✓ Type the keyword: **"drones"**
- ✓ Mindy derives the full coverage set (~8 NAICS)
- ✓ Shows total market + coverage ratio
- ✓ Obvious code = only 28% — the rest revealed

\$245M

across 70+ codes — one keyword, full coverage.
"Sport Mode" uses the entire set, not just the top 3.

● LIVE DEMO — Auto-Setup

Paste a capability statement → configured

- ✓ Paste your capability statement
- ✓ /api/suggest-codes reads it like an expert
- ✓ Suggests NAICS/PSC from real awards
- ✓ Browse sample opps → pick 3+ matches
- ✓ Profile built — codes, location, agencies

~30 sec

From a one-pager to a fully grounded profile. Every fact from USASpending — confirm before anything saves.

Drill Past the Agency

Useless

"The Army spends \$X."

Too big to act on.

A BD Target

"USACE Omaha District spends on your NAICS
— here's the small-business contact."

The office + the OSBP person to call.

From Department → Real Office

USACE — Omaha District

- ✓ Per-office spend on YOUR NAICS
- ✓ Contract count + distinct vendors
- ✓ The OSBP small-business contact, named

170

DoD commands with OSBP contacts

Per-office spend from USASpending awards. Contacts from the 170-command federal directory — the office + the person to call.

Paste It. Done.

30 sec

capability statement → fully configured

Mindy reads it like an expert — codes, location, set-asides, buying agencies — all grounded in real spend. Confirm before anything saves.

Mindy Never Guesses

Every code and every dollar comes straight from
USASpending FY2025 — not an AI hallucination.

See It All Live at the Mindy Launch

Saturday, June 27, 2026 — the full launch demo.
